BESSERN Building Products

Endurit Moisture Vapor Control Systems Pre-Installation Checklist and Extended Warranty Qualifying Documentation

This Pre-Installation Checklist is to be used by the installation contractor to assess the suitability of a project to qualify for a BESSERN Building Products - ENDURIT MVC Extended Warranty. We understand that not all of the Checklist information is always available. However, to provide an extended warranty and a successful installation, taking the time to understand and discuss the Pre-Installation Check List parameters with the Owner, General Contractor and Specifer will be necessary. This checklist must be submitted to BESSERN before application of any Endurit MVC products.

If you find that the ENDURIT MVC Products are not free from manufacturing defects, BESSERN Building Products must be notified in writing within fifteen (15) days of application of the product(s). The notification should include the lot number of the material in question. BESSERN reserves the opportunity to inspect the installation and may require further testing and sampling.

The Bessern Building Products team is available to answer your technical questions, help interpret test results and to give guidance on the installation of ENDURIT MVC systems. We may be reached at 484-234-5035.

Upon completing this form, please fax to 484-234-5037 or email to warranty@BESSERN.com .

CONCRETE FLOOR DESCRIPTION

Area of installation:	sq. ft.	Slab thickness:	inches
Age of Concrete:	years		
Slabs to be treated:	Below-grade	□ On-grade	Above-grade
On- or below-grade: moisture retarder below slab?		🗆 No	□ Yes
Prior failed flooring?		🗆 No	Yes (describe)
Curing compound or sealer used?			Yes (describe)
Concrete Floor Hardners used?			Yes (describe)
Compessive Strength measured?			Yes (readings)
Elcometer Pulls taken?			☐ Yes (readings)
Surface Contaminates?			□ Yes (observations)
Slab Level?		□ No	□ Yes
Slab Irregularities?			☐ Yes (describe)
JOINTS AND CRACKS			
Spacing of saw cuts	ft. x	ft. 🛛 Not	filled 🔲 Filled
Size of saw cutsWic	lth	Depth	
Movement Cracks?		🗆 No	Yes (describe)

SURFACE CONDITION				
Shotblasting	□ No □ Yes			
Edge Grinding	□ No □ Yes			
ICRI CSP Value (Minimum of 3 required)				
Grinding?	□ No □ Yes (describe machine type)			
Scarification?	□ No □ Yes (describe method)			
VAPOR CONDITIONS AND TESTING				
ASTM F-1869 Testing?	□ No □ Yes Highest Reading			
ASTM F- 2170 Testing?	□ No □ Yes Highest Reading			
pH Measurement?	□ No □ Yes Highest Reading			
Core Samples taken?	□ No □ Yes			
Core results review by BESSERN?	□ No □ Yes			
PRODUCT APPLICATION				
Dew Point Checked?*	□ No □ Yes Time am/pm			
Slab Temperature Checked?*	□ No □ Yes Temp⁰F Time am/pm			
Air Temperature Checked?*	□ No □ Yes Temp⁰F Time am/pm			
Ambient Humidity Checked?*	□ No □ Yes Time am/pm			
*must be taken just prior to application				
ENDURIT Product used				
Spread rate (ft ² /gallon)	□ 100 □ 125 □ 150			
Squeegee applied?	□ No □ Yes Notch size (mils)			
Back-rolled?	□ No □ Yes NAP size (inches)			
Building Enclosed?	□ No □ Yes			
HVAC running?	□ No □ Yes			

All the information provided above is an accurate and complete description of the conditions and processes used on this project. I acknowledge and understand that any misrepresentations or falsifications may result in the voiding or issuance of warranties by BESSERN.
